7

8   FOR THE NORTHERN DISTRICT OF CALIFORNIA

9

10   ORACLE AMERICA, INC.,

11   Plaintiff,   No. C 10-03561 WHA

12   v.

13   GOOGLE INC.,   **FURTHER MEDIATION**
                                                  WITH JUDGE KIM
14   Defendant.

15   _____/

16   Counsel will also please mediate with Magistrate Judge Sallie Kim and settle upon

17   an agreed statement for the jury regarding what is and is not copyright protected among the

18   37 APIs and the meaning of declaring code and SSO as well as exactly which methods within

19   the three APIs (within the 37) were necessary to write in the Java programming language.

20   Please try to complete this before the trial begins. Counsel are being unnecessarily stubborn.

21   These should be simple to resolve.

22   The trial judge envisions (but does not order) something that explains that the APIs are

23   composed of classes, libraries, etc., and within each are specific methods and each method

24   begins with a specified line of declaring code. The function and nature of declaring code will

25   be explained versus the implementing code. The taxonomy of the SSO will be explained and

26   stated to be copyright protected (as are the declaring lines of code). The implementing code can

27   also be copyright protected but in this case Google did not use Sun's implementing code.

28

With respect to the necessity to use APIs to write in the Java programming language,

62 methods within three APIs (here specify) are needed.

IT IS SO ORDERED.

Dated: May 3, 2016.
